DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose an apparatus to inject steam into a hydrocarbon effluent passing through a TLE cone of a hydrocarbon cracking furnace comprising an injection probe connected at an angle in a range of about 30 to about 60 degrees to said TLE cone and a distribution nozzle connected to the end of the injection probe, wherein said injection probe and distribution nozzle protrude into said TLE cone by a distance in the range of about 1% to about 10% of the radius of the TLE cone, nor does it disclose a corresponding method for its use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lenglet et al. (USPN 5,972,206). This reference discloses a steam cracking process for hydrocarbon feeds.
